#284

Narrative: A camper near Healy Lake reported a lighting strike which grew into a fire. Helitack aboard N16973 was dispatched. The fire was sized-up at 50-100 acres and very active. Retardant, air attack, jumpers, and CL 215's were ordered. Helitack concentrated on structure protection. Incoming IHC crews Plumas and Tahoes were spiked at DAF for transport in the morning to replace SMJs. The fire was hit hard and long with retardant and water with the expectation of aiding ground forces with containment.

	Narrative: Smokey conditions over the fire prevented zone surveillance from mapping the fire. It was making runs to the southwest, and exhibited extreme fire behavior when a thunder cell passed over the area. Smokejumpers and hotshots conducted burnout operations on the NW corner of the Buffalo Ranch. An additional load of smokejumpers was deployed to assist with operations and some paracargo supplies were received. Personnel will continue burnout operations to secure homesites tomorrow.

Narrative: There were observed runs in various locations south of the fire. Runs through black spruce with flame lengths to 75 feet, column climbing to 10,000 feet were reported. Long range spotting ahead of the fire up to ¾ mile was seen. Flanking in other areas was reported with low to moderate spread. Extreme fire behavior was observed until 0100 hours. The column over the south end of the fire built and collapsed several times, accelerating fire growth. The Snake River crew was inserted into a residence west of the Bearpaw River. Chena and Denali held burn out operations on the East and West side of Mucha Lake with severe wind shifts and speed for cabin protection. Personnel continued to hold burn operations near a cabin southeast of the fire area along the Kantishna River. Plans are to continue to secure and mop up near structures and an allotment 7 miles south of the mouth of the Toklat. MODIS heat was incorporated into the fire size estimate since smoke obscures much of the southwestern end where rapid growth has taken place. Growth has occurred over the last few days

Narrative: The fire made a significant run to the northwest today. Observed fire behavior included running surface fire, active crown fire, backing crown fire, and spotting. The fire blew out all control lines and crossed the access road into the fire. Personnel pulled back to safety zones. All personnel were flown out of the fire area by helicopter and plan to retrieve an engine and ATV's if fire activity minimizes enough for safe retrieval by morning. The fire size is a conservative estimate, as smoke made accurate mapping difficult. Two type 2 crews arrived late today, with 2 type 2 crews ordered for delivery tomorrow.
